€1,501 – €3,000

Disclaimer: Most damage entries are related to traffic accidents, but not exclusively. Some entries may end up on the report for different reasons, such as damage assessments, auctions, vehicle inspections, repairs and other similar events, actions or circumstances. Entries like these may indicate, for example, that the vehicle was inspected and assessed at an authorised service centre, or that repairs, warranty service, diagnostics, vehicle inspection or other similar services were performed. These vehicle inspections or assessments may be done due to damage caused during a traffic accident, but also for other reasons, such as legal requirements and/or processes, information published by the manufacturer, warranty or non-warranty repairs, correction of poorly performed repairs, or damage not related to traffic accidents (e.g. theft, mechanical damage, etc.). It is important to note that such entries do not necessarily indicate the consequences of a traffic

accident – they may also be related to the use, maintenance or operation of the vehicle in accordance with the requirements and circumstances set by the manufacturer or third parties.

Damage Glossary

Assessment
Assessment is the process of evaluating the extent of damage to a vehicle. It involves inspecting the vehicle to determine what repairs are needed, estimating the costs, and deciding whether the vehicle is repairable or considered a total loss.

Past repair cost estimate

If the vehicle has reported damage, the past repair cost is estimated based on where the damage was assessed and is shown in that country's currency. This amount may differ from what you'd expect locally. Here's why: Repair prices vary between countries due to differences in labor rates and parts costs. The estimate is based on work that is done at official service centers, which are typically more expensive than independent garages.
