Disclaimer: Most damage entries are related to traffic accidents, but not exclusively. Some entries may end up on the report for different reasons, such as damage assessments, auctions, vehicle inspections, repairs and other similar events, actions or circumstances. Entries like these may indicate, for example, that the vehicle was inspected and assessed at an authorised service centre, or that repairs, warranty service, diagnostics, vehicle inspection or other similar services were performed. These vehicle inspections or assessments may be done due to damage caused during a traffic accident, but also for other reasons, such as legal requirements and/or processes, information published by the manufacturer, warranty or non-warranty repairs, correction of poorly performed repairs, or damage not related to traffic accidents (e.g. theft, mechanical damage, etc.). It is important to note that such entries do not necessarily indicate the consequences of a traffic accident – they may also be related to the use, maintenance or operation of the vehicle in accordance with the requirements and circumstances set by the manufacturer or third parties.

Damage Glossary

Past repair cost estimate

If the vehicle has reported damage, the past repair cost is estimated based on where the damage was assessed and is shown in that country's currency. This amount may differ from what you'd expect locally.

Here's why:

Repair prices vary between countries due to differences in labor rates and parts costs.

The estimate is based on work that is done at official service centers, which are typically more expensive than independent garages.

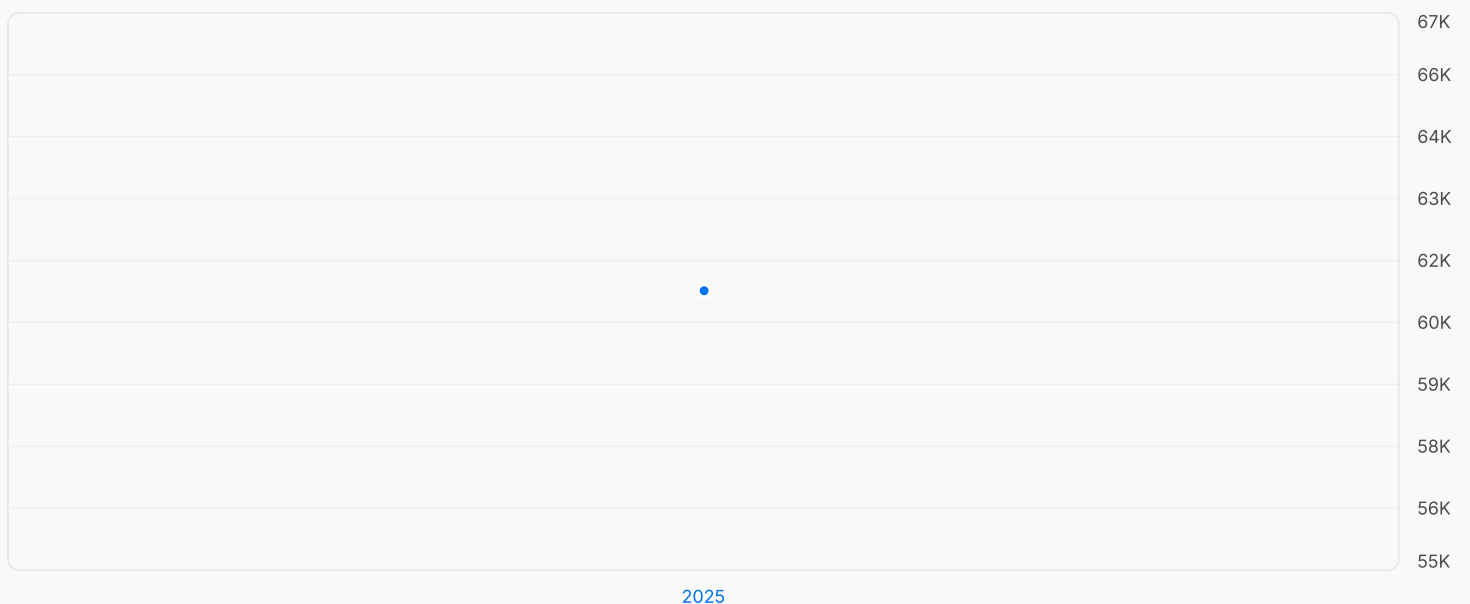

Market price

We checked how this vehicle's market price has changed over time, based on available historical data and price estimates.

The timeline shows a limited period and does not reflect the vehicle's full lifetime pricing.

Summary

- Last known selling price: €61,000
- Be cautious of hidden issues if the vehicle was on sale for significantly less than the current price!

Selling prices

05/2025 €61,000

Emissions

We analysed how much CO₂ this car model typically produces and what taxes or fees may apply.

Helpful tips after reading the report

Every tip you check off helps you avoid unwelcome surprises later. The more you check, the safer your car deal.

Do these checks before buying a car:

Get a professional inspection

An expert mechanic can spot hidden issues you might miss. Here's what to do next:

- Book a pre-purchase inspection at an independent or authorised service
- Ask the mechanic to check key systems: engine, brakes, suspension, electronics
- Request written notes or a report of any issues found

Ask for service records

Service records show how well the car has been looked after. Here's what to do next:

- Ask the seller for the car's service book or maintenance records
- Check for regular oil changes, filter replacements, and timing belt work
- Note any missing or overdue services

Check if the mileage matches

Make sure the mileage in this report matches the car's odometer readings. Your latest known mileage is **39,527 km**. Here's what to do next:

- Check the odometer reading against the mileage in the report
- Watch for signs of tampering (worn pedals, suspicious dashboard fixes)
- Ask the seller about any differences

Take a real test drive

A proper test drive helps you spot problems with performance, handling, or comfort – you'll notice much more on the road than you will in the parking lot. Here's what to do next:

- Drive on different road types: highway, city traffic, and bumpy or uneven surfaces
- Listen for strange noises or vibrations
- Pay attention to handling and comfort

Compare with similar cars

Checking other listings helps you know if the asking price is fair – or worth negotiating. Here's what to do next:

- Search for similar cars online (same make, model, year, mileage)
- Compare asking prices
- Look at car condition and equipment
- Use this info to negotiate with the seller
